

A 3x3 grid puzzle. The top-left corner contains the number 1, the top-right corner contains the number 4, the bottom-left corner contains the number 7, and the bottom-right corner contains the number 1. Each cell contains a pattern of lines and circles. The patterns are as follows:

- Top-left (1): A circle at (1,1) with a line going up-right to (1,2), then down-right to (2,2), then up-left to (2,1), and finally down-left to (3,1).
- Top-middle: A circle at (1,2) with a line going down to (2,2), then left to (2,1), and finally up-left to (3,1).
- Top-right: A circle at (1,3) with a line going down to (2,3), then left to (2,2), and finally up-left to (3,2).
- Middle-left: A circle at (2,1) with a line going up to (1,1), then right to (1,2), and finally down-right to (2,2).
- Middle-middle: A circle at (2,2) with a line going up to (1,2), then left to (1,1), and finally down-left to (3,1).
- Middle-right: A circle at (2,3) with a line going up to (1,3), then left to (1,2), and finally down-left to (3,2).
- Bottom-left: A circle at (3,1) with a line going up to (2,1), then right to (2,2), and finally up-right to (3,2).
- Bottom-middle: A circle at (3,2) with a line going up to (2,2), then left to (2,1), and finally up-left to (3,1).
- Bottom-right (1): A circle at (3,3) with a line going up to (2,3), then left to (2,2), and finally up-left to (3,2).
