

The image shows a 3x3 grid of 9 squares. Each square contains a unique geometric pattern composed of lines and circles. The patterns are numbered 2 through 8, with the bottom-right square being empty. The patterns are as follows:

- Top-left:** A circle at the top-right intersection, a circle at the bottom-left intersection, and a circle at the bottom-right intersection. A line connects the top-left intersection to the top-right intersection, and another line connects the top-left intersection to the bottom-left intersection.
- Top-middle:** A circle at the top-left intersection, a circle at the top-right intersection, and a circle at the bottom-right intersection. A line connects the top-left intersection to the top-right intersection, and another line connects the top-left intersection to the bottom-right intersection.
- Top-right:** A circle at the top-left intersection, a circle at the top-right intersection, and a circle at the bottom-right intersection. A line connects the top-left intersection to the top-right intersection, and another line connects the top-left intersection to the bottom-right intersection.
- Middle-left:** A circle at the top-left intersection, a circle at the top-right intersection, and a circle at the bottom-right intersection. A line connects the top-left intersection to the top-right intersection, and another line connects the top-left intersection to the bottom-right intersection.
- Middle-middle:** A circle at the top-left intersection, a circle at the top-right intersection, and a circle at the bottom-right intersection. A line connects the top-left intersection to the top-right intersection, and another line connects the top-left intersection to the bottom-right intersection.
- Middle-right:** A circle at the top-left intersection, a circle at the top-right intersection, and a circle at the bottom-right intersection. A line connects the top-left intersection to the top-right intersection, and another line connects the top-left intersection to the bottom-right intersection.
- Bottom-left:** A circle at the top-left intersection, a circle at the top-right intersection, and a circle at the bottom-right intersection. A line connects the top-left intersection to the top-right intersection, and another line connects the top-left intersection to the bottom-right intersection.
- Bottom-middle:** A circle at the top-left intersection, a circle at the top-right intersection, and a circle at the bottom-right intersection. A line connects the top-left intersection to the top-right intersection, and another line connects the top-left intersection to the bottom-right intersection.
- Bottom-right:** An empty square.
