

A 3x3 grid logic puzzle. The grid is divided into three 2x2 quadrants by a central row and column. The numbers 1 through 9 are placed in specific cells, and paths of arrows connect them. The paths are as follows:

- Path 1:** Starts at 9 (top-right), goes left to 1 (top-middle), then down to 7 (middle-right), then down to 5 (bottom-right), then left to 2 (bottom-middle), then left to 6 (bottom-left), then up to 5 (middle-left), then up to 4 (top-left), and finally up to 3 (top-top).
- Path 2:** Starts at 2 (bottom-middle), goes left to 6 (bottom-left), then up to 5 (middle-left), then up to 4 (top-left), and finally up to 3 (top-top).
- Path 3:** Starts at 3 (top-top), goes right to 4 (top-left), then down to 5 (middle-left), then down to 5 (bottom-left), then right to 6 (bottom-left), then right to 2 (bottom-middle), then right to 5 (bottom-right), then right to 7 (middle-right), then right to 9 (top-right).
