

A 6x6 grid with numbers and paths. The numbers are located at (1,4)=3, (2,3)=4, (2,5)=3, (3,2)=8, (4,1)=7, (5,6)=3, and (6,5)=6. Paths of circles and arrows are shown. For example, a path starts at (1,1), goes to (1,4), then to (2,3), and continues with arrows. Another path starts at (2,1), goes to (2,3), then to (3,2), and continues with arrows. The paths are complex and interwoven across the grid.
