

A 3x3 grid puzzle. The grid contains numbers 1 through 7 in various cells. Each number is associated with a path of circles and arrows. The paths are as follows:

- 1:** Located at the bottom center. Path: one circle moving up.
- 2:** Located in the middle row, second column. Path: one circle moving up, then right, then down, then left, then up, then right.
- 3:** Located at the top right. Path: one circle moving left, then up, then right, then down, then left, then up, then right.
- 4:** Located at the bottom right. Path: one circle moving left, then up, then right, then down, then left, then up, then right.
- 5:** Located at the top center. Path: one circle moving left, then up, then right, then down, then left, then up, then right.
- 6:** Located in the middle row, third column. Path: one circle moving left, then up, then right, then down, then left, then up, then right.
- 7:** Located in the middle row, first column. Path: one circle moving left, then up, then right, then down, then left, then up, then right.
