

The image shows a 3x3 grid of 9 4-way puzzles. Each puzzle is a 3x3 grid of cells. Some cells contain a circle with a number (1-9) and an arrow pointing in one of the four cardinal directions. The goal is to trace the path of the numbered circle through the grid, following the arrows, until it reaches a cell with a different number or a dead end. The paths are shown as continuous lines connecting the numbered circles.
