

A 3x3 grid puzzle. The grid contains numbers and arrows indicating paths. The numbers are: 6 (top-left), 7 (top-middle), 4 (top-right), 6 (middle-middle), 2 (middle-right), 3 (bottom-middle), 4 (bottom-left), and 8 (bottom-left corner). The arrows indicate paths starting from the numbers and moving in the four cardinal directions (up, down, left, right) until they reach a circle. The paths are: 6 (top-left) moves right to a circle; 7 (top-middle) moves right to a circle; 4 (top-right) moves down to a circle; 6 (middle-middle) moves left to a circle; 2 (middle-right) moves left to a circle; 3 (bottom-middle) moves left to a circle; 4 (bottom-left) moves right to a circle; 8 (bottom-left corner) moves right to a circle.
