

A 6x6 grid puzzle. The grid is divided into four 3x3 quadrants by thick black lines. Numbers are placed in circles at the start of paths:

- Top-left quadrant:** A circle with the number 9 is at row 4, column 2. A path starts from it, goes right to (4,3), up to (3,3), left to (3,2), down to (3,1), right to (3,0), and finally up to (2,0).
- Top-right quadrant:** A circle with the number 5 is at row 2, column 5. A path starts from it, goes left to (2,4), down to (3,4), left to (3,3), and finally down to (4,3).
- Middle-right quadrant:** A circle with the number 4 is at row 3, column 5. A path starts from it, goes left to (3,4), down to (4,4), left to (4,3), and finally down to (5,3).
- Bottom-left quadrant:** A circle with the number 9 is at row 5, column 2. A path starts from it, goes left to (5,1), up to (4,1), right to (4,2), and finally up to (3,2).
- Bottom-right quadrant:** A circle with the number 3 is at row 5, column 5. A path starts from it, goes left to (5,4), up to (4,4), left to (4,3), and finally up to (3,3).

Other circles without numbers are located at (1,0), (1,4), (2,4), (3,0), (3,1), (3,2), (4,0), (4,1), (4,2), (4,4), (5,0), (5,1), (5,4), and (5,5). Paths consist of straight line segments connecting these points.
