

A 3x3 grid puzzle. The grid contains numbers 1 through 9 in some cells, and paths (lines with arrows) in others. The paths connect the numbers in a sequence. The numbers are located at the following coordinates (row, column): 1 (2,3), 2 (3,3), 3 (1,3), 4 (3,1), 5 (2,3), 6 (1,3), 7 (3,1), 8 (3,3), 9 (2,1). The paths are as follows: 1 starts at (2,3) and goes to (3,3); 2 starts at (3,3) and goes to (3,2); 3 starts at (1,3) and goes to (1,2); 4 starts at (3,1) and goes to (3,2); 5 starts at (2,3) and goes to (2,2); 6 starts at (1,3) and goes to (1,2); 7 starts at (3,1) and goes to (3,2); 8 starts at (3,3) and goes to (3,2); 9 starts at (2,1) and goes to (2,2).
