

The image shows a 3x3 grid of 9 squares. Each square contains a path of a ball starting from a circle and ending at an arrow. The paths are numbered 2 through 9. The grid is divided into three rows and three columns by thick black lines.

- Top Row:**
 - Top-left square: Path 2. Starts at a circle in the top-left corner, goes right to the middle, then down to the bottom, and finally right to the middle of the right edge.
 - Top-middle square: Path 3. Starts at a circle in the top-right corner, goes left to the middle, then down to the bottom, and finally left to the middle of the left edge.
 - Top-right square: Path 9. Starts at a circle in the top-right corner, goes left to the middle, then down to the bottom, and finally left to the middle of the left edge.
- Middle Row:**
 - Middle-left square: Path 6. Starts at a circle in the bottom-left corner, goes right to the middle, then up to the top, and finally left to the middle of the left edge.
 - Middle-middle square: Path 2. Starts at a circle in the bottom-left corner, goes right to the middle, then up to the top, and finally left to the middle of the left edge.
 - Middle-right square: Path 4. Starts at a circle in the bottom-right corner, goes left to the middle, then up to the top, and finally left to the middle of the left edge.
- Bottom Row:**
 - Bottom-left square: Path 6. Starts at a circle in the bottom-left corner, goes right to the middle, then up to the top, and finally left to the middle of the left edge.
 - Bottom-middle square: Path 2. Starts at a circle in the bottom-left corner, goes right to the middle, then up to the top, and finally left to the middle of the left edge.
 - Bottom-right square: Path 4. Starts at a circle in the bottom-right corner, goes left to the middle, then up to the top, and finally left to the middle of the left edge.
