

A 3x3 grid puzzle. The numbers are placed in the top-left, top-middle, middle-left, and bottom-right cells. The paths are represented by lines connecting circles in the grid cells. The paths are as follows:

- 6** (top-left): A path starting from the top-left circle, moving right, then down, then right again to the top-middle circle.
- 8** (top-middle): A path starting from the top-middle circle, moving right, then down, then right again to the top-right circle.
- 5** (middle-left): A path starting from the middle-left circle, moving right, then down, then right again to the middle-middle circle.
- 1** (middle-middle): A path starting from the middle-middle circle, moving right, then down, then right again to the middle-right circle.
- 5** (bottom-left): A path starting from the bottom-left circle, moving right, then down, then right again to the bottom-middle circle.
- 9** (bottom-right): A path starting from the bottom-right circle, moving right, then down, then right again to the bottom-middle circle.
