

A 5x5 grid logic puzzle. The grid is divided into four quadrants by a vertical line between columns 2 and 3, and a horizontal line between rows 2 and 3. The puzzle consists of numbers 1-9 placed in specific cells, and paths of circles and arrows starting from these numbers. The paths are as follows:

- Number 1:** Located at (2, 1). Path: (2, 1) → (2, 2) → (2, 3) → (2, 4) → (2, 5).
- Number 2:** Located at (2, 2). Path: (2, 2) → (2, 3) → (2, 4) → (2, 5).
- Number 3:** Located at (2, 3). Path: (2, 3) → (2, 4) → (2, 5).
- Number 4:** Located at (2, 4). Path: (2, 4) → (2, 5).
- Number 5:** Located at (2, 5). Path: (2, 5) → (2, 6) → (2, 7) → (2, 8) → (2, 9).
- Number 6:** Located at (3, 1). Path: (3, 1) → (3, 2) → (3, 3) → (3, 4) → (3, 5).
- Number 7:** Located at (3, 2). Path: (3, 2) → (3, 3) → (3, 4) → (3, 5).
- Number 8:** Located at (3, 3). Path: (3, 3) → (3, 4) → (3, 5).
- Number 9:** Located at (3, 4). Path: (3, 4) → (3, 5).

The paths are represented by circles at each step and arrows indicating the direction of movement. The paths for numbers 1, 2, 3, and 4 are all horizontal paths starting from their respective numbers and moving to the right. The paths for numbers 5, 6, 7, 8, and 9 are all vertical paths starting from their respective numbers and moving downwards.
