

A 3x3 grid puzzle. The grid contains numbers and paths. The numbers are: 1, 5, 3, 2, 8, 5, 6, 8. The paths are: 1. A path starting from the top-left circle, going right, then up, then right, ending at the top-right circle. 2. A path starting from the bottom-left circle, going up, then right, then right, ending at the bottom-right circle. 3. A path starting from the top-right circle, going left, then down, then left, ending at the top-left circle. 4. A path starting from the middle-left circle, going left, then up, then right, ending at the middle-right circle. 5. A path starting from the middle-right circle, going right, then down, then right, ending at the middle-left circle. 6. A path starting from the bottom-right circle, going left, then up, then left, ending at the bottom-left circle. 7. A path starting from the bottom-right circle, going left, then up, then left, ending at the bottom-left circle. 8. A path starting from the bottom-right circle, going left, then up, then left, ending at the bottom-left circle.
