

A 6x6 grid divided into 12 numbered regions by thick black lines. The regions are defined as follows:

- Region 1: A horizontal line from (4,1) to (5,1).
- Region 2: A horizontal line from (3,1) to (4,1).
- Region 3: A horizontal line from (2,1) to (3,1).
- Region 4: A horizontal line from (5,2) to (6,2).
- Region 5: A horizontal line from (4,2) to (5,2).
- Region 6: A horizontal line from (3,2) to (4,2).
- Region 7: A horizontal line from (2,2) to (3,2).
- Region 8: A horizontal line from (1,2) to (2,2).
- Region 9: A horizontal line from (5,3) to (6,3).
- Region 10: A horizontal line from (4,3) to (5,3).
- Region 11: A horizontal line from (3,3) to (4,3).
- Region 12: A horizontal line from (2,3) to (3,3).

The grid contains several geometric shapes and numbers:

- Region 1:** A circle at (5,1).
- Region 2:** A circle at (4,1).
- Region 3:** A circle at (3,1).
- Region 4:** A circle at (6,2).
- Region 5:** A circle at (5,2).
- Region 6:** A circle at (4,2).
- Region 7:** A circle at (3,2).
- Region 8:** A circle at (2,2).
- Region 9:** A circle at (6,3).
- Region 10:** A circle at (5,3).
- Region 11:** A circle at (4,3).
- Region 12:** A circle at (3,3).

Arrows indicate directions from the circles to the regions they belong to:

- Circle at (5,1) points right to Region 1.
- Circle at (4,1) points right to Region 2.
- Circle at (3,1) points right to Region 3.
- Circle at (6,2) points left to Region 4.
- Circle at (5,2) points left to Region 5.
- Circle at (4,2) points left to Region 6.
- Circle at (3,2) points left to Region 7.
- Circle at (2,2) points left to Region 8.
- Circle at (6,3) points left to Region 9.
- Circle at (5,3) points left to Region 10.
- Circle at (4,3) points left to Region 11.
- Circle at (3,3) points left to Region 12.
