

A 4x4 grid with 16 squares. The grid is divided into four 2x2 quadrants by a vertical line between the second and third columns and a horizontal line between the second and third rows. The numbers and their positions are as follows:

- Top-left quadrant (rows 1-2, columns 1-2):
 - Row 1, Column 2: Circle with number 5.
 - Row 2, Column 1: Circle with number 5.
- Top-right quadrant (rows 1-2, columns 3-4):
 - Row 1, Column 3: Circle with number 5.
 - Row 2, Column 4: Circle with number 7.
- Bottom-left quadrant (rows 3-4, columns 1-2):
 - Row 3, Column 1: Circle with number 9.
 - Row 4, Column 2: Circle with number 3.
- Bottom-right quadrant (rows 3-4, columns 3-4):
 - Row 3, Column 3: Circle with number 9.
 - Row 4, Column 4: Circle with number 5.

The line segments are as follows:

- From (1,2) to (2,1): A line segment from the circle to the bottom-left corner of the square.
- From (2,1) to (2,2): A horizontal line segment from the circle to the right edge of the square.
- From (1,3) to (2,4): A line segment from the circle to the bottom-right corner of the square.
- From (2,4) to (2,3): A horizontal line segment from the circle to the left edge of the square.
- From (3,1) to (3,2): A horizontal line segment from the circle to the right edge of the square.
- From (3,2) to (3,1): A vertical line segment from the circle to the top edge of the square.
- From (4,2) to (4,1): A horizontal line segment from the circle to the left edge of the square.
- From (4,1) to (4,2): A vertical line segment from the circle to the top edge of the square.
- From (3,3) to (4,4): A line segment from the circle to the bottom-right corner of the square.
- From (4,4) to (4,3): A horizontal line segment from the circle to the left edge of the square.
