

A 3x3 grid logic puzzle. The grid contains numbers 1 through 7 in various cells. Each number is associated with a path of circles and arrows. The paths are as follows:

- 1:** Starts at (1,1), moves right to (1,2), then down to (2,1).
- 2:** Starts at (2,3), moves down to (3,3), then left to (3,2).
- 3:** Starts at (1,2), moves down to (2,2), then left to (2,1).
- 4:** Starts at (1,3), moves down to (2,3), then left to (2,2).
- 5:** Starts at (2,1), moves down to (3,1), then right to (3,2).
- 6:** Starts at (3,1), moves right to (3,2), then up to (2,2).
- 7:** Starts at (2,3), moves down to (3,3), then left to (3,2).

The grid is divided into four regions by thick black lines: a 2x2 region in the top-left, a 1x2 region in the top-right, a 2x2 region in the bottom-left, and a 1x2 region in the bottom-right.
