

A 3x3 grid puzzle. The grid contains numbers 1 through 8 in some cells, and paths of arrows in others. The paths are as follows:

- Cell 1 (Row 1, Column 1):** Contains a path starting from the top-left corner, moving right, then down, then right, then down, then right, ending at the bottom-right corner.
- Cell 2 (Row 1, Column 2):** Contains a path starting from the top-left corner, moving right, then down, then right, then down, then right, ending at the bottom-right corner.
- Cell 3 (Row 1, Column 3):** Contains a path starting from the top-left corner, moving right, then down, then right, then down, then right, ending at the bottom-right corner.
- Cell 4 (Row 2, Column 1):** Contains a path starting from the top-left corner, moving right, then down, then right, then down, then right, ending at the bottom-right corner.
- Cell 5 (Row 2, Column 2):** Contains a path starting from the top-left corner, moving right, then down, then right, then down, then right, ending at the bottom-right corner.
- Cell 6 (Row 2, Column 3):** Contains a path starting from the top-left corner, moving right, then down, then right, then down, then right, ending at the bottom-right corner.
- Cell 7 (Row 3, Column 1):** Contains a path starting from the top-left corner, moving right, then down, then right, then down, then right, ending at the bottom-right corner.
- Cell 8 (Row 3, Column 2):** Contains a path starting from the top-left corner, moving right, then down, then right, then down, then right, ending at the bottom-right corner.
