

A 5x5 grid puzzle. The grid contains numbers 1 through 9 in various cells. Some cells contain a circle with an arrow pointing in a specific direction. The paths are as follows:

- 1:** Circle at (3,4) with an arrow pointing up.
- 2:** Circle at (5,5) with an arrow pointing left.
- 3:** Circle at (1,1) with an arrow pointing right.
- 4:** Circle at (2,2) with an arrow pointing down.
- 5:** Circle at (2,3) with an arrow pointing down.
- 6:** Circle at (4,1) with an arrow pointing left.
- 7:** Circle at (1,2) with an arrow pointing up.
- 8:** Circle at (4,4) with an arrow pointing left.
- 9:** Circle at (3,3) with an arrow pointing left.

The paths are connected by lines, forming a continuous loop that visits all numbered cells. The path starts at 1, goes up to 2, then left to 3, then up to 4, then right to 5, then right to 6, then down to 7, then right to 8, then down to 9, then left to 1, and finally down to 2.
