

The puzzle is a 6x6 grid divided into four 3x3 quadrants by a central 2x2 square. The grid contains numbers and arrows indicating movement paths. Some numbers are circled, and some cells contain empty circles.

		5		3				2	7	
		3						8	4	9

Arrows indicate movement paths between numbers and empty circles. For example, in the top-left quadrant, an arrow points from 5 to an empty circle, and another from 3 to an empty circle. In the top-right quadrant, an arrow points from 2 to 8, and another from 7 to 9. In the bottom-left quadrant, an arrow points from 3 to an empty circle, and another from 9 to an empty circle. In the bottom-right quadrant, an arrow points from 4 to 3, and another from 3 to 2.
