

A 6x6 grid puzzle. The grid contains several circles representing pieces. Numbers are placed in some cells, each with arrows indicating movement directions:

- Number 2**: Located at row 2, column 3. Arrows point right to (2,4) and down-left to (3,2).
- Number 3**: Located at row 6, column 5. Arrows point up-right to (5,6), left to (6,4), and down-left to (7,4).
- Number 4**: Located at row 6, column 4. An arrow points left to (6,3).
- Number 5**: Located at row 2, column 5. Arrows point down-left to (3,4) and down to (3,5).
- Number 6**: Located at row 6, column 5. An arrow points left to (6,4).
- Number 7**: Located at row 3, column 5. Arrows point up-left to (2,4) and up to (2,5).
- Number 8**: Located at row 2, column 6. Arrows point down-left to (3,5) and down to (3,6).

The goal is to move the numbered pieces so that they occupy all eight positions where numbers were originally placed.
