

The sequence of diagrams illustrates the construction of the number 100 using circles and rectangles. The sequence consists of 12 diagrams arranged in two rows of six. The first row shows the initial steps: two circles, followed by the addition of rectangles to reach 10, 20, 30, 40, and 50. The second row continues the process, showing the addition of more rectangles to reach 60, 70, 80, 90, and finally 100, which is represented by a large rectangle divided into 100 smaller units.

1 2 5 2 4 1 4 3 1 2 1 1
