

The image shows a 3x3 grid of 9 4x4 mini-grids. Each mini-grid contains numbers and circles representing nodes. The goal is to connect the nodes with lines of the same number without crossing or overlapping lines.

Mini-grid 1 (Top Left): Contains numbers 6, 4, 3. Nodes are at (1,1), (1,2), (2,1), and (2,2).

Mini-grid 2 (Top Middle): Contains numbers 1, 1. Nodes are at (1,1), (1,2), (2,2), and (2,3).

Mini-grid 3 (Top Right): Contains numbers 1, 5, 7, 9. Nodes are at (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), and (3,2).

Mini-grid 4 (Middle Left): Contains numbers 5, 9, 6. Nodes are at (1,1), (1,2), (2,1), (2,2), (2,3), (3,1), and (3,2).

Mini-grid 5 (Middle Middle): Contains numbers 4, 6, 5. Nodes are at (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), and (3,2).

Mini-grid 6 (Middle Right): Contains numbers 8, 9, 2, 8. Nodes are at (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), and (3,2).

Mini-grid 7 (Bottom Left): Contains numbers 8, 9, 7, 4. Nodes are at (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), and (3,2).

Mini-grid 8 (Bottom Middle): Contains numbers 7, 3, 8. Nodes are at (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), and (3,2).

Mini-grid 9 (Bottom Right): Contains numbers 6, 8. Nodes are at (1,1), (1,2), (1,3), (2,1), (2,2), (2,3), (3,1), and (3,2).
