

PUZZLE MADNESS

Daily Hard Greater Than Sudoku Puzzle for Thursday 3rd January 2008

A 6x6 grid of arrows on a white background. The grid is defined by six vertical and six horizontal black lines. Arrows are placed at the intersections of these lines, pointing in various directions: up, down, left, and right. The arrows are black and have a thin, slightly curved tail. The grid is divided into 36 equal-sized squares. Arrows are present in every square except for the central one, which is empty.
