

PUZZLE MADNESS

Daily Hard Greater Than Sudoku Puzzle for Friday 23rd December 2011

		>			>		<	
<					<			

This is a 9x9 grid for a Greater Than Sudoku puzzle. The grid is divided into three 3x3 blocks by thick black lines. The numbers 1 through 9 must be placed in the grid such that each row, column, and 3x3 block contains all digits exactly once. Additionally, the greater than (>) and less than (<) symbols between cells indicate the relative values of the digits in adjacent cells. For example, if a cell contains a 3 and its neighbor contains a 1, the 3 must be in the higher position. If a cell contains a 5 and its neighbor contains a 7, the 5 must be in the lower position.
