

PUZZLE MADNESS

Daily Hard Greater Than Sudoku Puzzle for Thursday 2nd June 2011

A 5x5 grid of arrows on a coordinate system. The grid consists of 25 small squares. Each square contains one of four types of arrows: a left-pointing arrow (<), a right-pointing arrow (>), an up-pointing arrow (^), or a down-pointing arrow (v). The arrows are arranged in a repeating pattern across the grid. The first row has arrows pointing right (>) in the first three squares, then up (^) in the fourth, and down (v) in the fifth. The second row has arrows pointing left (<) in the first two squares, then up (^) in the third, down (v) in the fourth, and right (>) in the fifth. This pattern continues for all five rows.
