

# PUZZLE MADNESS

Daily Hard Greater Than Sudoku Puzzle for Monday 9th July 2012

A 4x8 grid of symbols representing a 2D cellular automaton rule. The grid consists of four horizontal rows and eight vertical columns. Each cell contains one of four symbols: '^' (upward triangle), 'v' (downward triangle), '<' (leftward triangle), and '>' (rightward triangle). The symbols represent the neighborhood of each cell according to a specific rule, likely related to Conway's Game of Life or a similar cellular automaton. The grid is bounded by thick black lines.
