

# PUZZLE MADNESS

Daily Hard Greater Than Sudoku Puzzle for Monday 27th May 2013

A 4x8 grid of arrows on a coordinate system. The grid consists of 32 cells arranged in four rows and eight columns. Each cell contains one of four types of arrows: a right-pointing arrow (>), a left-pointing arrow (<), an up-pointing arrow (^), or a down-pointing arrow (^). The arrows are distributed as follows:

- Row 1: >, >, v, v, <, v, v, v
- Row 2: >, ^, v, <, v, v, ^, v
- Row 3: >, >, v, <, <, <, <, ^
- Row 4: v, <, >, >, ^, <, <, ^

The grid is bounded by thick black lines at the top, bottom, and right edges, while the left edge is defined by a thin vertical line.
