

# PUZZLE MADNESS

Daily Hard Greater Than Sudoku Puzzle for Tuesday 9th February 2016

	<	>						
<		>						

This is a 9x9 grid for a Greater Than Sudoku puzzle. The grid is divided into 3x3 subgrids by thick black lines. Numerical values are not provided; instead, the grid contains inequality symbols (< or >) in some cells to indicate the relative values of the numbers in adjacent cells. The symbols are placed such that they point from lower values to higher values. For example, if a cell contains '<', it means the number in that cell must be less than the number in an adjacent cell. The goal is to fill the grid with digits 1 through 9 so that each row, column, and 3x3 subgrid contains each digit exactly once, and all inequality constraints are satisfied.
