

# PUZZLE MADNESS

Daily Hard Greater Than Sudoku Puzzle for Thursday 22nd June 2023

A 6x6 grid of arrows on a light gray background. The grid consists of six horizontal rows and six vertical columns, intersecting at 36 points. At each intersection point, there is either a black upward-pointing triangle (>) or a black downward-pointing triangle (<). The pattern follows a specific rule: if the sum of the row number and column number is even, an upward-pointing triangle is placed; if it is odd, a downward-pointing triangle is placed. This results in a repeating triangular pattern across the entire grid.
