

A 10x10 grid with a black border. A complex black path is drawn on the grid, starting from the top-left corner and ending at the bottom-right corner. The path consists of several connected segments, creating a maze-like structure. The path starts at (0,0), goes right to (1,0), then down to (1,1), then right to (2,1), then down to (2,2), then right to (3,2), then down to (3,3), then right to (4,3), then down to (4,4), then right to (5,4), then down to (5,5), then right to (6,5), then down to (6,6), then right to (7,6), then down to (7,7), then right to (8,7), then down to (8,8), then right to (9,8), then down to (9,9), and finally right to (10,9). The path is composed of horizontal and vertical segments, with some segments being longer than others. The path is drawn with a thick black line, and the grid is drawn with a thin black line. The path is a single continuous line, and it does not cross itself. The path is a simple polygon, and it is the only path of this type in the grid. The path is a single continuous line, and it does not cross itself. The path is a simple polygon, and it is the only path of this type in the grid.
