

A 10x10 grid with a black border. A complex black path is drawn on the grid, starting from the top-left corner (row 1, column 1) and ending at the bottom-right corner (row 10, column 10). The path consists of several interconnected loops and dead ends, creating a maze-like structure. The path is composed of thick black lines, while the grid lines are thin and gray. The path starts at (1,1), goes right to (1,10), then down to (10,10), then left to (10,1), then up to (1,1). The path also includes several internal loops, such as one around (2,2) to (3,3) and another around (4,4) to (5,5). The path is a single continuous line that visits every cell in the grid at least once.
