

A 10x10 grid with a complex black path and a light gray shaded area. The path starts at the top-left corner (0,0) and winds through the grid, ending at the bottom-right corner (9,9). The path is composed of thick black lines that form a continuous, non-self-intersecting route. The area between the path and the grid boundaries is filled with a light gray color. The grid lines are thin and gray, while the path lines are thick and black. The overall shape of the path is irregular, with many turns and loops. The path starts at (0,0), goes right to (4,0), then down to (4,1), then right to (6,1), then down to (6,2), then right to (8,2), then down to (8,3), then right to (9,3), then down to (9,4), then right to (9,5), then down to (9,6), then right to (9,7), then down to (9,8), then right to (9,9). The path is a single continuous line that covers the entire grid area, with the area between the path and the grid boundaries being light gray. The path is a single continuous line that covers the entire grid area, with the area between the path and the grid boundaries being light gray. The path is a single continuous line that covers the entire grid area, with the area between the path and the grid boundaries being light gray.
