

A 6x6 grid with numbers and diamond-shaped nodes. The numbers are: Row 1: (1,1)=6, (3,1)=7, (4,1)=3, (5,1)=6; Row 2: (1,2)=2, (3,2)=5, (4,2)=6; Row 3: (1,3)=3, (2,3)=7, (5,3)=4, (6,3)=2; Row 4: (1,4)=8, (3,4)=7, (5,4)=9, (6,4)=1; Row 5: (1,5)=5, (2,5)=1, (3,5)=6, (4,5)=3, (5,5)=2, (6,5)=4; Row 6: (1,6)=5, (4,6)=8. Diamond-shaped nodes are located at (1,2), (2,1), (2,3), (3,2), (3,4), (4,1), (4,3), (5,2), (5,4), (5,6), (6,1), (6,3), (6,5). A path of gray lines connects the nodes in the following order: (1,2) → (2,1) → (2,3) → (3,2) → (3,4) → (4,1) → (4,3) → (5,2) → (5,4) → (5,6) → (6,1) → (6,3) → (6,5).
