

A 6x6 grid with 3x3 subgrids. The grid contains numbers and gray lines connecting them. The numbers are placed in the following cells (row, column): (1,4)=1, (1,5)=8, (2,1)=2, (2,2)=6, (2,3)=3, (2,4)=8, (2,5)=1, (2,6)=2, (2,7)=4, (3,1)=2, (3,2)=6, (3,3)=3, (3,4)=8, (3,5)=5, (3,6)=2, (3,7)=2, (4,1)=1, (4,2)=7, (4,3)=6, (4,4)=7, (4,5)=5, (4,6)=2, (4,7)=1, (4,8)=6. The gray lines connect the numbers in the following paths: (1,4) to (1,5) to (2,4) to (2,5) to (2,6) to (2,7) to (3,7) to (3,6) to (3,5) to (3,4) to (3,3) to (3,2) to (3,1) to (4,1) to (4,2) to (4,3) to (4,4) to (4,5) to (4,6) to (4,7) to (4,8). The empty diamond shapes are placed in the following cells: (1,1), (1,2), (1,3), (1,6), (1,7), (2,4), (2,5), (2,8), (3,1), (3,2), (3,3), (3,4), (3,5), (3,6), (3,7), (3,8), (4,1), (4,2), (4,3), (4,4), (4,5), (4,6), (4,7), (4,8).
