

A 6x6 grid with numbers and paths. The grid is divided into four 3x3 quadrants by a vertical line between columns 3 and 4 and a horizontal line between rows 3 and 4. The numbers are placed in the following cells: (1,1)=1, (1,2)=2, (1,3)=8, (1,4)=2, (1,5)=9, (1,6)=4, (2,1)=7, (2,2)=8, (2,3)=4, (2,4)=1, (2,5)=5, (2,6)=6, (2,6)=8, (3,2)=5, (3,3)=1, (3,4)=5, (3,5)=8, (3,6)=7, (4,1)=6, (4,2)=6, (4,3)=6, (4,4)=1, (4,5)=2, (5,1)=2, (5,2)=4, (5,3)=1, (5,4)=7. The paths are: 1. A path starting at (1,1), going down to (2,1), then right to (2,2), then down to (3,2), then right to (3,3), then down to (4,3), then right to (4,4), then down to (5,4), then right to (5,5), then down to (6,5). 2. A path starting at (1,2), going down to (2,2), then right to (2,3), then down to (3,3), then right to (3,4), then down to (4,4), then right to (4,5), then down to (5,5), then right to (5,6). 3. A path starting at (1,4), going down to (2,4), then right to (2,5), then down to (3,5), then right to (3,6), then down to (4,6), then right to (4,5), then down to (5,5), then right to (5,6). 4. A path starting at (1,5), going down to (2,5), then right to (2,6), then down to (3,6), then right to (3,5), then down to (4,5), then right to (4,4), then down to (5,4), then right to (5,5), then down to (6,5). 5. A path starting at (1,6), going down to (2,6), then right to (2,5), then down to (3,5), then right to (3,4), then down to (4,4), then right to (4,3), then down to (5,3), then right to (5,2), then down to (6,2).
