

A 6x6 grid puzzle. The grid is divided into four 3x3 quadrants by a horizontal and vertical line. Numbers are placed in some cells, and paths are drawn through some cells. The paths are composed of straight line segments connecting adjacent cells (horizontally, vertically, or diagonally). The paths are: 1. A path starting at (1,1), going right to (1,2), then down to (2,2), then right to (2,3), then down to (3,3), then right to (3,4), then down to (4,4), then right to (4,5), then down to (5,5), then right to (5,6), then down to (6,6). 2. A path starting at (1,3), going right to (1,4), then down to (2,4), then right to (2,5), then down to (3,5), then right to (3,6), then down to (4,6), then right to (4,7), then down to (5,7), then right to (5,8), then down to (6,8). 3. A path starting at (1,5), going right to (1,6), then down to (2,6), then right to (2,7), then down to (3,7), then right to (3,8), then down to (4,8), then right to (4,9), then down to (5,9), then right to (5,10), then down to (6,10). 4. A path starting at (1,7), going right to (1,8), then down to (2,8), then right to (2,9), then down to (3,9), then right to (3,10), then down to (4,10), then right to (4,11), then down to (5,11), then right to (5,12), then down to (6,12). The paths are: 1. A path starting at (1,1), going right to (1,2), then down to (2,2), then right to (2,3), then down to (3,3), then right to (3,4), then down to (4,4), then right to (4,5), then down to (5,5), then right to (5,6), then down to (6,6). 2. A path starting at (1,3), going right to (1,4), then down to (2,4), then right to (2,5), then down to (3,5), then right to (3,6), then down to (4,6), then right to (4,7), then down to (5,7), then right to (5,8), then down to (6,8). 3. A path starting at (1,5), going right to (1,6), then down to (2,6), then right to (2,7), then down to (3,7), then right to (3,8), then down to (4,8), then right to (4,9), then down to (5,9), then right to (5,10), then down to (6,10). 4. A path starting at (1,7), going right to (1,8), then down to (2,8), then right to (2,9), then down to (3,9), then right to (3,10), then down to (4,10), then right to (4,11), then down to (5,11), then right to (5,12), then down to (6,12).
