

A scatter plot on a 10x10 grid. The grid lines are light gray. There are 30 data points, each represented by a small open circle with a black outline. The points are distributed across the grid, with a higher density in the center and fewer points near the edges. The points are located at the following approximate (x, y) coordinates (where (0,0) is the bottom-left corner):

Point	X	Y
