

A scatter plot on a 10x10 grid. The grid lines are light gray. There are 35 data points represented by open black circles. The points are distributed across the grid, with a higher density in the upper right quadrant. The points are located at the following approximate (x, y) coordinates (where (0,0) is the bottom-left corner):

Point	x	y
1	0.5	0.5
2	1.5	0.5
3	2.5	0.5
