

A scatter plot on a 10x10 grid. The grid lines are light gray. There are 40 data points, each represented by a small circle with a black outline and a white fill. The points are distributed across the grid, with a higher density in the center and fewer points near the edges. The points are located at the following (x, y) coordinates (assuming (0,0) is the bottom-left corner):

x	y
