

A 10x10 grid with 30 black circles scattered across it. The circles are distributed in a way that appears random, with some clusters and some empty spaces. The grid lines are thin and light gray, while the circles are solid black with thin outlines. The circles are of uniform size and are scattered across the grid, with some near the edges and some in the center. The overall distribution is sparse, with approximately one-third of the grid cells containing a circle.
