

The image shows a square grid with a thick black border. Inside the grid, there are several horizontal and vertical black line segments of varying lengths. These segments form a single, continuous, non-convex polygon. The shape has multiple indentations and protrusions along its perimeter. Starting from the top-left corner and moving clockwise, the boundary consists of several steps and turns. Notable features include a large rectangular notch on the right side and a smaller one near the bottom center. The interior of the shape is mostly empty space defined by the grid lines.
