

The image shows a 4x4 grid of 16 squares. Each square contains a 3x3 sub-grid. Within each sub-grid, there are numbers and grey circles connected by lines, representing a logic puzzle. The numbers and circles are distributed as follows:

- Top-left square:** Top row has a circle at (1,1) and the number 5 at (1,2). Middle row has a circle at (2,1) and the number 5 at (2,2). Bottom row has the number 9 at (3,1) and the number 5 at (3,2).
- Top-middle square:** Top row has the number 4 at (1,3). Middle row has a circle at (2,1) and the number 5 at (2,2). Bottom row has the number 9 at (3,1) and the number 5 at (3,2).
- Top-right square:** Top row has the number 8 at (1,1) and the number 4 at (1,2). Middle row has the number 4 at (2,1) and the number 7 at (2,3). Bottom row has a circle at (3,1) and the number 6 at (3,3).
- Middle-left square:** Top row has the number 9 at (1,1) and the number 5 at (1,2). Middle row has the number 7 at (2,2). Bottom row has the number 2 at (3,1), the number 7 at (3,2), and the number 1 at (3,3).
- Middle-middle square:** Middle row has the number 7 at (2,2). Bottom row has a circle at (3,3) with the number 1 next to it.
- Middle-right square:** Middle row has a circle at (2,3). Bottom row has a circle at (3,3).
- Bottom-left square:** Top row has the number 7 at (1,1) and the number 4 at (1,3). Middle row has the number 2 at (2,2). Bottom row has a circle at (3,1) and the number 2 at (3,3).
- Bottom-middle square:** Top row has the number 2 at (1,1) and the number 1 at (1,2). Middle row has the number 3 at (2,1) and the number 4 at (2,2). Bottom row has the number 1 at (3,3) and the number 2 at (3,4).
- Bottom-right square:** Top row has the number 6 at (1,2). Middle row has the number 6 at (2,2). Bottom row has the number 4 at (3,1) and the number 2 at (3,3).
