

The image displays three 3x3 grids, each representing a logic puzzle. The grids are separated by thick black lines. Each grid contains numbers in some cells and paths (represented by grey lines) connecting other cells. The paths are composed of horizontal and vertical segments. The numbers are placed in the cells, and the paths connect the cells in a way that suggests a solution to the puzzle.

Grid 1 (Left):

- Row 1: Cell (1,3) has a number 3. A path starts at (1,3), goes left to (1,1), then down to (2,1).
- Row 2: Cell (2,1) has a number 7. A path starts at (2,1), goes down to (3,1).
- Row 3: Cell (3,1) has a number 4. A path starts at (3,1), goes right to (3,3).
- Row 1: Cell (1,2) has a number 6. A path starts at (1,2), goes right to (1,3), then down to (2,2).
- Row 2: Cell (2,2) has a number 4. A path starts at (2,2), goes down to (3,2).
- Row 3: Cell (3,2) has a number 3. A path starts at (3,2), goes left to (3,1), then up to (2,1).

Grid 2 (Middle):

- Row 1: Cell (1,2) has a number 2. A path starts at (1,2), goes right to (1,3), then down to (2,3).
- Row 2: Cell (2,2) has a number 6. A path starts at (2,2), goes right to (2,3), then down to (3,3).
- Row 3: Cell (3,2) has a number 6. A path starts at (3,2), goes left to (3,1), then up to (2,1).
- Row 1: Cell (1,1) has a number 6. A path starts at (1,1), goes right to (1,2), then down to (2,2).
- Row 2: Cell (2,1) has a number 4. A path starts at (2,1), goes down to (3,1).
- Row 3: Cell (3,1) has a number 7. A path starts at (3,1), goes right to (3,2), then up to (2,2).

Grid 3 (Right):

- Row 1: Cell (1,1) has a number 2. A path starts at (1,1), goes right to (1,2), then down to (2,2).
- Row 2: Cell (2,1) has a number 9. A path starts at (2,1), goes down to (3,1).
- Row 3: Cell (3,1) has a number 1. A path starts at (3,1), goes left to (3,2), then up to (2,2).
- Row 1: Cell (1,2) has a number 6. A path starts at (1,2), goes right to (1,3), then down to (2,3).
- Row 2: Cell (2,2) has a number 8. A path starts at (2,2), goes down to (3,2).
- Row 3: Cell (3,2) has a number 9. A path starts at (3,2), goes left to (3,1), then up to (2,1).
- Row 1: Cell (1,3) has a number 1. A path starts at (1,3), goes left to (1,2), then down to (2,2).
- Row 2: Cell (2,3) has a number 9. A path starts at (2,3), goes left to (2,2), then down to (3,2).
- Row 3: Cell (3,3) has a number 6. A path starts at (3,3), goes left to (3,2), then up to (2,2).
