A 13x13 grid puzzle for train tracks. The grid is mostly empty, with some cells containing train tracks. The tracks are represented by vertical lines (for straight tracks) and diagonal lines (for curved tracks). The numbers 1 through 9 are placed above the columns, and the numbers 3 through 8 are placed to the right of the rows. The puzzle is to be solved by placing train tracks in the empty cells such that the number of tracks in each row and column matches the given numbers.
